Allowable Subject Matter

1. Claims 4-5, 7-9, 11, 13, 20-22, 24-34 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 4, 13, the applicants have presented persuasive argument that the cited prior art of record fails to disclose a method of etching an organic dielectric layer over a substrate comprises the step of generating an etchant gas comprising NH₃, which selectively etches the organic dielectric layer with respect to the hard mask/which is able to selectively etch the organic low k dielectric layer with respect to the hard mask and strips the photoresist layer. In the contrary, the closest cited prior art of Yen (US 6,080,529) discloses a step of etching silicon dioxide masking layer 222/hard mask more rapidly than organic low k dielectric layer 220/ selectively etch the hard mask layer with respect to the organic low k dielectric layer using NH₃ (col 12, lines 60-62).

Regarding claim 24, the applicants have presented a persuasive argument that the cited prior art of record fails to disclose a method of etching an organic dielectric layer comprises the step of generating a plasma from a NH₃ gas with a flow rate from about 300 sccm to about 800 sccm, which etches the organic dielectric layer. The closest cited prior art of Kadomura et al (US 6,352,937) discloses generating a plasma from a NH₃ gas with a flow rate from about 100 sccm, which etches the organic layer 4

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
